EDUCATION

Thu Duc College of Technology

2022-2025

SOFT SKILLS

- Team Collaboration
- Self-Learning & Initiative
- Problem Solving
- Critical thinking
- Growth mindset
- Business understanding

TECHNICAL SKILLS

- Frameworks & Libraries: Angular, React Native
- Languages: TypeScript, JavaScript, HTML5, SCSS, Pug
- Integration: Node.js, RESTful APIs, Webhook, n8n, workflows, WebSocket, CORS
- Version Control & Collaboration: Git, GitHub, Agile/Scrum
- State Management

Professional Summary / Objective

Angular developer with 2 years of experience building scalable web applications, proficient in RxJS, RESTful APIs, and team collaboration. Seeking to leverage skills in a fast-paced Agile environment.

PROJECT

February 2024 – June 2024

Online Coffee Shop Application (Team of 3)

- Developed an online coffee shop app integrating Firebase for backend services and real-time database.
- Used project management tools like Trello and version control with GitHub to coordinate teamwork and track progress.
- Analyzed app features and delegated tasks effectively among team members to ensure timely delivery.
- Managed code merges and resolved conflicts to maintain a clean and functional codebase.
- Integrated external libraries such as Lodash for utility functions, Chart.js for data visualization, and animation libraries to enhance user experience.
- Designed and implemented UI layouts, ensuring a user-friendly and responsive interface.

WORK EXPERIENCE

June 2023 – June 2025

CUBABLE Industries

Frontend

- Developed and completed assigned tasks in an Agile Scrum environment, enhancing proficiency in Angular framework and Pug templating engine.
- Integrated third-party libraries seamlessly into the Angular application to extend functionality and improve user experience.
- Implemented real-time notifications using WebSocket, enabling instant communication within the app.
- Collaborated effectively with team members, fostering knowledge sharing and continuous learning of best practices in Angular development.
- Utilized Angular's strengths such as component-based architecture, dependency injection, and reactive programming with RxJS to build scalable and maintainable applications.
- Gained hands-on experience with agile methodologies, improving time management, teamwork, and communication skills.
- Adapted quickly to project requirements, demonstrating initiative and a growth mindset throughout the development process.
